PROFILE

Detail-oriented QA Engineer with hands-on experience in manual and automated testing of POS systems, management platforms, and web applications. Skilled in Selenium, RestAssured, Jira, and JMeter. Passionate about improving product reliability and user experience through structured testing and collaborative development.

TECHNICAL SKILLS

- **Languages:** Java, Python, C/C++, PHP, SQL
- **Automation Tools:** Selenium, RestAssured, JMeter
- **Test Management:** Jira, Excel
- **Web Technologies:** Laravel, WordPress, HTML, CSS, JavaScript
- **Databases:** MySQL, Firebase
- **Version Control:** GitHub

PROFESSIONAL EXPERIENCE

Associate Quality Assurance Engineer   Jul 2025 - Present
Pixzarloop (Pvt) Ltd, Negombo, Sri Lanka
- Perform **manual testing** for POS systems, management systems, and web applications to ensure product stability and functionality.
- **Design and execute detailed test cases** to verify functional, UI, and data accuracy across modules.
- Conduct **regression, smoke, and user acceptance testing (UAT)** for new features and system enhancements.
- Collaborate closely with **developers and project managers** to identify, document, and resolve defects efficiently.
- Maintain **test documentation, evidence, and reports** in Jira and Excel to ensure traceability and coverage.
- Performed **basic load testing using JMeter** to assess system performance under limited user load conditions.

Software Quality Assurance Intern   Jan 2025 - Jul 2025
Pixzarloop (Pvt) Ltd, Negombo, Sri Lanka
- Assisted in **manual testing** of POS systems, management systems, and dynamic web projects during various development phases.
- **Prepared and executed detailed test cases** to validate functional and integration requirements across multiple modules.
- **Identified, documented, and tracked defects** in Jira with clear reproduction steps and severity classification.
- Collaborated with developers to **verify bug fixes** and ensure consistency between requirements and implementation.
- Supported **regression and UAT cycles**, contributing to improving overall QA workflows and test coverage

Software Quality Assurance Intern   Apr 2024 - Oct 2024
Sri Lanka Telecom, Colombo, Sri Lanka
- Developed and executed automated **Selenium** test cases in **Python** for web applications, including

data-driven testing for user sign-up flows.
- Automated REST API testing for the **mySLT portal** using **RestAssured (Java)**, writing and executing **GET, POST, PUT, PATCH, DELETE** requests.
- Generated detailed API test reports using **TestNG**, and automated the process to send reports via email for failed cases.
- Collaborated with the QA team to continuously review, refine, and improve test cases for web applications.
- Worked on automating the generation and handling of authorization tokens in API tests, optimizing the testing process.

PROJECTS

POS System Development & Enhancement
Pixzarloop (Pvt) Ltd
- Involved in **end-to-end manual testing** from the initial development phase to current enhancements of the POS system.
- Designed and executed **comprehensive test cases** covering functional workflows, UI, data integrity, and business rules.
- Conducted **regression, smoke, and UAT cycles** for new features, ensuring smooth implementation and release readiness.
- Documented **defects in Jira** and collaborated with developers to validate fixes and confirm feature accuracy.
- Gained exposure to **load testing** using JMeter for performance evaluation under limited user loads.

Internal Management System Projects
Pixzarloop (Pvt) Ltd
- Tested web-based **management systems** used internally for department/store operations.
- Validated workflows, data integrity, and UI elements across multiple modules.
- Assisted in verifying new features and improvements during development and deployment stages.

Static & Dynamic Websites / Admin Panel Testing
Pixzarloop (Pvt) Ltd
- Conducted **manual testing** of company websites and web applications with admin panels.
- Checked functionality, responsiveness, form validation, and cross-browser compatibility.
- Documented issues and suggested improvements for UI/UX and performance.
